ImmuneMed Inc.

Product Highlights

Scrub Typhus / Leptospira Rapid

We are exporting the diagnostic kits using lateral flow immunoChromatographic assay for early detection of acute febrile illnesses such as Scrub typhus, Leptospirosis and Hemorrhagic fever with renal syndrome.

Now we are developing various diagnostic kits that can diagnose about Dengue Hemorrhagic Fever and Typhoid Fever, etc. ImmuneMed's Rapid test provides not only rapid diagnosis of Acute Febrile Illness but also sensitive detection of each IgM and IgG antibody simultaneously.

Furthermore, these kits are easy to handle and provide rapid interpretation of the result even with no equipment. In addition, these kits are useful for the follow up study and the estimation of reinfection and residual antibody.
