### Product Highlights

#### AFS® Water Purification System

Economical and reliable high-performance water purification systems for analyzers with pure water needs up to 3000 L daily

#### **A robust system with reliable performance**

The AFS® E systems combine 24/7 real-time monitoring, remote control, cutting-edge water purification technologies, and an advanced user interface to improve lab productivity.

#### **Outstanding, rapid service**

System users benefit from an unprecedented level of service. A preinstallation feed water analysis, combined with our Watercare Pact plans enhanced with remote

connection capabilities, will maximize your system's performance and reliability.

#### **Low and predictable running costs**

Patented Elix® technology provides constant-quality water without the need for resin cylinders, softeners, or conditioning cartridges, which means reduced maintenance, less analyzer downtime, low running costs — and greater productivity.
