

## Nanobiz Co., Ltd.

### Product Highlights

#### VISCORE 300

#### Measurement System

:The system enables diagnostic prediction of various cardiovascular diseases that have risen sharply worldwide. VISCORE™, the fluid viscosity measurement device of NanoBiz Co., Ltd., provides measurement data on blood viscosity characteristics based on changes in blood flow rates depending on blood characteristics, heart rate, and blood vessel diameter.

#### Features

- \* Whole blood viscosity measurement system that reduces time, and allows for small blood samples to be used
- \* Disposable Lab-on-a-chip without the need for cleansing; safe and hygienic
- \* Produces stable and accurate data in light of the physical properties of blood without being affected by outside environmental factors
- \* Site-friendly measurement system tailored to typical hospital conditions, including laboratories and clinical and diagnostic testing departments
